Cloud Standard

- **Are your existing financial systems in place for several years and approaching end of life?**
- **Are you gaining sufficient value from those financial systems?**
- **Is it now time to implement a modern solution to enhance your business?**
- **Need advice on how to best derive a suitable solution and components you will utilise?**
- **Are you considering a move to Cloud ERP?**

Solutions Advisory

Learn about our "Solution Advisory" options from Vertice and see how they can enable your organisation to determine what best suits your needs as a business...

In order to increase the probability of a successful project on time, within budget and embraced by business and enterprise users, we advise that you carry out the following steps:

Key Areas

- **Scoping:** To ensure the project meets your requirements, it's imperative to document what your needs are, across all the different departments in your business. We can help you through this process with the result being a professional RFP (Request for Proposal). This can be provided to your proposed vendors to guarantee they can meet the criteria you have set.
- **Supplier validation:** We can assist you to find the best Specialist partner for your company. It's imperative you feel comfortable with their staff as your relationship with their company can last for years, with such a business-critical solution.
- **Product selection:** It can be difficult to find the best software components to fit your budget. Our team can ensure that you ultimately choose the best product that is fit for your requirements and enhanced user adoption.
- **Project management:** A successful outcome will be dependent on 2 key people; your Project Manager and your chosen Suppliers Project Manager, they will get the project over the line to success, only if they work well together using proven, tested and agreed project methodologies.
